

Green Stormwater Infrastructure Symposium 2016 **For Students!**

Wednesday, March 30th 1:00-6:30 PM, UVM's Davis Center

“Healing the Waters Through Ecological Design”

Keynote Address

Dr. John Todd

Dr. Todd is a pioneer in the field of ecological design and engineering and Professor Emeritus of UVM's Rubenstein School of Environment and Natural Resources. His ideas have inspired current trends in the **Green Stormwater Infrastructure** field and his work continues to challenge design norms by **integrating natural systems** to solve complex pollution problems.
