

Garrett Meigs	Research Staff	<p>We are studying the long-term trends and patterns of forest health and disturbance in the Northern Forest region. We seek someone to help compile and analyze remotely sensed data of forest change (maps based on aerial surveys and satellite imagery). We also would love assistance with summarizing data from field-based studies.</p>	<p>Keen interest in forest ecosystems and forest health; appreciation for and experience with long-term environmental monitoring; experience reviewing literature and working with databases in Excel; experience with GIS and remote sensing a nice bonus.</p>	5 hours/week	unpaid or work study	<p>Please email me with a brief resume and paragraph explaining why interested in forest health and relevant skills/experience.</p>	gmeigs@uvm.edu
