

Courtney Hammond Wagner	PhD Student	<p>In this study I am looking at the interaction between water quality policy and on-farm decision making in Vermont and New Zealand to better understand drivers of pro-water quality farm management. I've conducted a series of interviews with New Zealand farmers and will be using content analysis techniques to code and analyze this dataset.</p>	<p>Interest/experience in agriculture, water quality and/or human decision making. Experience with interviewing and qualitative coding and content analysis would be plus, but I'm happy to work with someone excited to learn methods.</p>	5 hours/week	Unpaid	<p>Email me with a resume and paragraph explaining why interested and relevant skills/experiences.</p>	crhammon@uvm.edu
Kim Coleman	Post Doc	<p>I am involved in a collaborative research project examining sustainability and place-based education at UVM. The goals of the research are to understand 1) how students' understanding of sustainability varies across the disciplinary units at UVM and 2) if and how students' understanding of sustainability is deepened by place-based experiences that are integrated into sustainability courses. The undergraduate researcher may help with a variety of tasks including transcribing emails, entering data, helping to plan and implement data collection, and other emergent duties.</p>	<p>Interest in environmental education and/or place-based pedagogy, attention to detail, timeliness, and professionalism.</p>	5 hours/week	Unpaid	<p>Send resume to kimberly.coleman@uvm.edu along with a short paragraph that outlines 1) why you are interested in the position and 2) the skills you will bring to the work.</p>	kimberly.coleman@uvm.edu
