| Michael Wironen | PhD Student | <p>The focus of my current research is developing a material flow account (using ag. stats and other resources) for phosphorus in agriculture going back to 1945. This will be paired with interview data to help document and explain the changing patterns of Vermont's phosphorus use and ag. economy. It will be used to inform policy around nutrient taxes and deposit/refund systems to reduce nutrient use and water pollution.</p> | <p>Detail-oriented, comfortable with Excel. Able to work independently with some guidance. Interest in ecological economics, industrial ecology, agricultural systems is a plus. Previous experience not strictly necessary. Time-permitting I am willing to provide mentoring, training, etc. for students interested in more hands-on collaboration.</p> | <p>5 hrs/week +/- (I am flexible, as long as we make progress!).</p> | <p>Unpaid</p> | <p>Email me with a resume and paragraph explaining why interested and relevant skills/experiences.</p> | <p>mwironen@uvm.edu</p> |
