

# VERMONT Dairy Mapping Project

## An enhanced farm biosecurity mapping resource for Secure Milk Supply planning

Identify strengths  
and weaknesses of  
biosecurity practices.

Visualize protected  
areas as zones,  
paths and points.

Anticipate the  
impacts of foreign  
animal diseases.

Prevent, detect  
and respond for  
animal health.

---

### Producer Outreach

During May and June, 2023, UVM animal science interns will work with farms to create maps and plans that meet the Secure Milk Supply Plan.

### Preparedness Planning

Enhances the readiness of Vermont dairy farms so producers can activate the level of biosecurity required for a foot-and-mouth disease outbreak.
